RE: ETS PROJECT NUMBER: 6060

Dear Dr. Sherrard:

Enclosed are toxicity test results for samples in support of the **Kingston Fly Ash Recovery Project** received by Environmental Testing Solutions, Inc. on March 10, 2010.

All unusual observations or deviations from standard test protocols are documented on the laboratory bench sheets. If you have any questions concerning these results, please feel free to contact me.

Sincerely,

Jim Sumner
Laboratory Director

CC: Dr. William Rogers, Tennessee Valley Authority

This report should not be reproduced, except in its entirety, without the written consent of Environmental Testing Solutions, Inc.
The results in this report relate only to the samples submitted for analysis.

ENVIRONMENTAL TESTING SOLUTIONS, INC. TOXICITY TEST REPORT

INTRODUCTION / EXECUTIVE SUMMARY

Report Date: March 19, 2010
ETS Project #: 6060

1. Client: Tennessee Valley Authority
2. Study: Kingston Fossil Plant, Fly Ash Recovery Project
3. Samples Tested: Stilling Pond Outfall 001, Emory River Dredge Plume,
Unaffected Emory River Water (ERM 12.2)
4. Date Samples Received: March 10, 2010

METHODS SUMMARY (see Appendix A for Additional Test Information)

Samples:

1. Sample Type:

Grab samples of Emory River Dredge Plume and ERM12.2 and 24-hour composite samples of Stilling Pond Outfall 001 were collected.

2. Sample Transportation, Storage, and Manipulation:

Samples were placed in ice chests on ice immediately after collection, where they remained during transport to Environmental Testing Solutions, Inc. by private courier. All samples were received at $< 6.0^{\circ}\text{C}$ and were refrigerated at $< 6.0^{\circ}\text{C}$ when not in use.

Aliquots of these samples, needed to prepare all test dilutions, were warmed to test temperature ($25.0 \pm 1.0^{\circ}\text{C}$) in a warm water bath immediately prior to use.

Sufficient volumes of each dilution were prepared to split the test concentrations between the Daphnid and fathead minnow tests.

Aliquots of each dilution were also UV treated. Fish pathogens present in upstream river water have been the suspected cause of test interferences (anomalous dose response and high variability among replicates) in previous toxicity testing at the Kingston Fossil Plant. These aliquots were UV-treated through a 40-watt Smart® UV Sterilizer (manufactured by Emperor Aquatics, Inc.) for 2 to 5 minutes (dependent on sample turbidity).

Test Organisms:

	<u><i>Pimephales promelas</i></u>	<u><i>Ceriodaphnia dubia</i></u>
1. Source:	<u>Aquatox, Inc.</u>	<u>In-house Cultures</u>
2. Age:	<u>< 24-hours old</u>	<u>< 24-hours old</u>

Test Conditions Summary:

1. Test Type/Conditions:	<u>Static Acute, Renewal at 48-hours</u>	<u>Static Acute, Renewal at 48-hours</u>
2. Test Duration:	<u>96-hours</u>	<u>96-hours</u>
3. Test Temperature:	<u>25.0 ± 1.0°C</u>	<u>25.0 ± 1.0°C</u>
4. Light Quality:	<u>Wide-spectrum fluorescent lighting</u>	<u>Wide-spectrum fluorescent lighting</u>
5. Light Intensity:	<u>50 – 100 ft-c</u>	<u>50 – 100 ft-c</u>
6. Photoperiod:	<u>16-hours light, 8-hours dark</u>	<u>16-hours light, 8-hours dark</u>
7. Test Chamber Size/Type:	<u>500 mL plastic disposable cup</u>	<u>40 mL polypropylene cups</u>
8. Test Solution Volume:	<u>200 mL</u>	<u>35 mL</u>
9. Number of Replicates:	<u>5</u>	<u>5</u>
10. Number of Organisms per Replicate:	<u>10</u>	<u>5</u>
11. Number of Organisms per Test Concentration:	<u>50</u>	<u>25</u>
12. Feeding regime:	<u>Fed newly hatched <i>Artemia</i> in holding prior to test initiation and 2-hours prior to test solution renewal at 48-hours.</u>	<u>Fed YWT and <i>Selenastrum</i> in holding prior to test initiation and 2-hours prior to test solution renewal at 48-hours.</u>
13. Aeration:	<u>None</u>	<u>None</u>
14. Control / Dilution Water:	<u>Unaffected Emory River Water (ERM 12.2)</u>	<u>Unaffected Emory River Water (ERM 12.2)</u>
15. Laboratory QC:	<u>Moderately Hard Synthetic Water</u>	<u>Moderately Hard Synthetic Water</u>
16. Test Chamber Cleaning:	<u>None</u>	<u>None</u>
17. Test Concentrations (%):	<u>100, 50, 25, 12.5, 6.25, 0 (river control), MHSW</u>	<u>100, 50, 25, 12.5, 6.25, 0 (river control), MHSW</u>
18. Sample Holding Time:	<u>First use ≤ 36-hours</u>	<u>First use ≤ 36-hours</u>
19. Endpoints:	<u>Survival</u>	<u>Survival</u>
20. Test Acceptability Criteria:	<u>≥ 90% survival in river control and negative control</u>	<u>≥ 90% survival in river control and negative control</u>
21. Physical / Chemical Measurements:	<u>Alkalinity, hardness, and total residual chlorine were measured in each full-strength sample tested. Daily temperatures were measured in one replicate for each test concentration. Pre-exposure test solutions were analyzed at test initiation and at the 48-hour renewal for pH, conductivity, and dissolved oxygen. Post-exposure test solutions were analyzed daily for pH and dissolved oxygen.</u>	
22. Statistics:	<u>Statistics were performed according to methods prescribed by EPA using ToxCalc version 5.0.23F statistical software (Tidepool Scientific Software, McKinneyville, CA).</u>	

TOXICITY TEST RESULTS

1. Sample: Emory River Dredge Plume (see Appendix B for ToxCalc™ Statistics Reports)

Collection Date: March 09, 2010

Test Dates: March 10 – 14, 2010

96-hour Survival:

Non-treated Sample:

Ceriodaphnia dubia: NOEC = 100%

Pimephales promelas: NOEC = 100%

UV-treated Sample:

Pimephales promelas: NOEC = 100%

2. Sample: Stilling Pond Outfall 001 (see Appendix C for ToxCalc™ Statistics Reports)

Collection Date: March 09, 2010

Test Dates: March 10 – 14, 2010

96-hour Survival:

Non-treated Sample:

Ceriodaphnia dubia: NOEC = 100%

Pimephales promelas: NOEC = 100%

UV-treated Sample:

Pimephales promelas: NOEC = 100%

APPENDIX A ADDITIONAL TOXICITY TEST INFORMATION

DEVIATIONS / MODIFICATIONS TO TEST PROTOCOL

1. *Pimephales promelas*
Minnow were < 24-hours old at test initiation.
2. *Ceriodaphnia dubia*
None

DEVIATIONS / MODIFICATIONS TO PRETEST CULTURE OR HOLDING OF TEST ORGANISMS

1. *Pimephales promelas*
None
2. *Ceriodaphnia dubia*
None

PHYSICAL AND CHEMICAL METHODS

1. Reagents, Titrants, Buffers, etc.: All chemicals were certified products used before expiration dates.
2. Instruments: All identification, service, and calibration information pertaining to laboratory instruments is recorded in calibration and maintenance logbooks.
3. Temperature was measured by SM 2550 B.
4. Dissolved oxygen was measured by SM 4500 O G.
5. The pH was measured by SM 4500 H+ B.
6. Conductance was measured by SM 2510 B.
7. Alkalinity was measured by SM 2320 B.
8. Total hardness was measured by SM 2340 C.
9. Total residual chlorine was measured by ORION Electrode Method 97-70.

QUALITY ASSURANCE

Toxicity Test Methods: All phases of the study including, but not limited to, sample collection, handling and storage, glassware preparation, test organism culturing/acquisition and acclimation, test organism handling during test, and maintaining appropriate test conditions were conducted according to the protocol as described in this report and EPA-821-R-02-012. Any known deviations were noted during the study and are reported herein.

REFERENCE TOXICANT TESTS (reference toxicant data is available upon request)

1. Test Type: 48-hour acute tests with results expressed as LC₅₀ values in g/L KCl or NaCl.
2. Standard Toxicant: Potassium Chloride (KCl crystalline) for *Pimephales promelas*.
Sodium Chloride (NaCl crystalline) for *Ceriodaphnia dubia*.
3. Dilution Water Used: Moderately hard synthetic water.
4. Statistics: ToxCalc software Version 5.0 was used for statistical analyses.

Auxiliary Tests							Statistic	Critical	Skew	Kurt
Shapiro-Wilk's Test indicates normal distribution (p > 0.01)							1	0.9		
Equality of variance cannot be confirmed										
The control means are not significantly different (p = 1.00)							0	2.3060041		
Hypothesis Test (1-tail, 0.05)			NOEC	LOEC	ChV	TU				
Steel's Many-One Rank Test			100	>100	1					
Treatments vs ERM-Control										

***Pimephales promelas* 96-Hour Acute Toxicity Test for UV-treated Stilling Pond Outfall 001
March 10 – 14, 2010**

Acute Fathead Minnow Test-96 Hr Survival									
Start Date:	3/10/2010	Test ID:	6060	Sample ID:	KIF, Stilling Pond Outfall 001				
End Date:	3/14/2010	Lab ID:	ETS-Envir. Testing Sol.	Sample Type:	UV-treated 24-hour Composite				
Sample Date:	3/9/2010	Protocol:	ACUTE-EPA-821-R-02-012	Test Species:	PP-Pimephales promelas				
Comments:	1 Still Pond Effluent composite sample for day 0 (initiation) and day 2 (renewal)
